

CHANGE Lanes™

For the best MPG*

*MONEY
PER
GAME

It'll fill your cash tank!

CHANGE LANES from Taito is the most exciting, challenging and accelerated driving game ever to hit the open road. And that means eager players will "fill 'er up" again and again!

With sweating palms and intense concentration, the player sets off on a mad race against the clock. His mission: to earn maximum points by traveling as far and fast—and with as few collisions—as possible. Time is fuel and precious little is allotted to make it to the additional fuel awards at each of the game's nine checkpoints. And the course is riddled with obstacles that—if hit—will stop the car momentarily, wasting vital fuel points. Autos, oil slicks, police cars, pylons—the obstacles become increasingly numerous and difficult to dodge. Worse yet, airplanes begin dropping missiles that will destroy the player's vehicle. A new car will be awarded only if enough bonus fuel points are available.

Upright
Height 170cm (67")
Width 61cm (24")
Depth 76cm (30")
Cried Weight 126kg (280 lbs.)

The player with fast reflexes can rack up extra points by "catching" the flashing green boxes dropped from a blimp, and avoiding collisions during the brief moments a green "bonus car" appears.

The player can maneuver his vehicle from gray lanes to grass to rivers to brown lanes, with the brown lanes allowing the highest speeds—and presenting the ultimate challenges that players thrive on!

So go ahead and CHANGE LANES. It'll put YOU in the fast lane to bigger profits!
